CONSTRUCTION WORK AT BEDFORD TOLL ON EVERETT TURNPIKE
REHABILITATION OF TOLL PLAZA CONCRETE LANES

The New Hampshire Department of Transportation announces construction work will accelerate at the Bedford Toll Plaza on the F. E. Everett Turnpike, beginning on Monday, March 22, 2004.

This construction is the beginning of the toll plaza's concrete lane rehabilitation. The work will take 10 weeks or more to complete. Individual lanes will be closed to permit the work. Motorists are advised to be alert for signs directing which lanes are closed and which lanes can be used.

This work is a continuation of an ongoing Everett Turnpike project. R. S. Audley, Inc. of Bow, New Hampshire is the contractor for the \$6.8 million project, which is scheduled for completion in October 2004.
